# HOMOEOPATHIC SPIRIT

Quarterly Bulletin

VOL : 2 (JUNE) YEAR 2023

## THE OBJECTIVE OF THIS INSTITUTIONAL BULLETIN IS:

1. To provide regular updates and propagate information about the accomplishments of all the faculty members and students.
2. To share significant information regarding the exceptional services rendered by the corresponding departments.
3. To keep everyone in this institution well informed and engaged with the objective to maintain motivation and raise morale.
4. This bulletin is for internal circulation and for educative purpose only.

**We are delighted to present the second Volume of this year's Homoeo Spirit to all of you.**

**As we advance through 2023, a variety of curricular and co-curricular activities have been successfully carried out.**

**Jawaharlal Nehru Homeopathic Medical College remains dedicated to the significant advancement and all-rounded development of its students.**

**Our students have demonstrated outstanding performance in the University exams for 1st, 2nd, and 4th year BHMS. With university toppers coming from our institution for 4th year, these exceptional results reflect the dedication and hard work of our students, filling us with immense pride.**

**Workshops have played a crucial role in enhancing the academic experience. One such notable event was the workshop on "Orientation of Research on Homeopathy" conducted by distinguished experts Dr. Shubmoy Ghosh and Dr. Abhijit Datta. Their insights and guidance provided invaluable knowledge, developing a deeper understanding of research methodologies in homeopathy.**

**PG students from Jawaharlal Nehru Homoeopathic Medical College have also made significant progress in academic research, with multiple articles published in prestigious journals. This highlights the scholarly abilities and commitment of our students to contribute to the field of homeopathy.**

**In addition to academic success, our students have excelled in extracurricular activities. Many have emerged victorious in district-level competitions, showcasing their talents and dedication beyond the classroom.**

**Furthermore, several students have been shortlisted for the Short-Term Studentship in Homeopathy, an opportunity that will further enhance their practical knowledge and skills.**

**We extend our gratitude to the management for providing an environment conducive to both academic prowess and personal development.**

**"BE HERE BE VIBRANT"**

# PRE-OPERATIVE PLANNING: TESTS & VISITS BEFORE A PLANNED SURGERY

**Dr Priyanka Shah**  
**Professor & H.O.D**  
**Department of Surgery**

**Dr Brijeshchandra Rathwa**  
**Assistant Professor**  
**Department of Surgery**

Your surgeon will want to make sure you are ready for your surgery. To do this, you will have some checkups and tests before surgery.

Many different people on your surgery team may ask you the same questions before your surgery. This is because your team needs to gather as much information as they can to give you the best surgery results. Try to be patient if you are asked the same questions more than once.

## Pre-op Checkup:

Pre-op is the time before your surgery. It means "before operation." During this time, you will meet with one of your health care providers. This may be your surgeon or primary care provider:

1. This checkup usually needs to be done within the month before surgery. This gives your providers time to treat any medical problems you may have before your surgery.

2. During this visit, you will be asked about your health over the years. This is called "taking your medical history." Your provider will also do a physical exam.

# PRE-OPERATIVE PLANNING: TESTS & VISITS BEFORE A PLANNED SURGERY

3.If you see your primary care provider for your pre-op checkup, make sure your hospital or surgeon gets the reports from this visit.

Some hospitals also ask you to have a phone conversation or meet with an anesthesia pre-op nurse before surgery to discuss your health.

You may also see your anesthesia provider the week before surgery. This provider will give you medicine that will make you sleep and not feel pain during surgery.

## Visits With Other Doctors

Your surgeon will want to make sure that other health conditions you may have will not cause problems during your surgery. So you may need to visit:

1.A heart doctor (cardiologist), if you have a history of heart problems or if you smoke heavily, have high blood pressure or diabetes, or are out of shape and cannot walk up a flight of stairs.

2.A diabetes doctor (endocrinologist), if you have diabetes or if your blood sugar test in your pre-op visit was high.

3.A sleep doctor, if you have obstructive sleep apnea, which causes choking or a stop in breathing when you are asleep.

4.A doctor who treats blood disorders (hematologist), if you've had blood clots in the past or you have close relatives who have had blood clots.

5.Your primary care provider for a review of your health problems, exam, and any tests needed before surgery.

## Tests Before Surgery:

Your surgeon may tell you that you need some tests before surgery. Some tests are for all surgical patients. Others are done only if you are at risk for certain health conditions.

Common tests that your surgeon may ask you to have if you have not had them recently are:

1. Blood tests such as a complete blood count (CBC) and kidney, liver, and blood sugar tests

2. Chest x-ray to check your lungs

3. Electrocardiogram (ECG) to check your heart

Some providers or surgeons may also ask you to have other tests. This depends on:

4. Your age and general health

5. Health risks or problems you may have

6. The type of surgery you are having

These other tests may include:

7. Tests that look at the lining of your bowels or stomach, such as a colonoscopy or upper endoscopy.

8. Heart stress test or other heart tests

9. Lung function tests

10. Imaging tests, such as an MRI scan, CT scan, or ultrasound test

Make sure the providers who do your pre-op tests send the results to your surgeon. This helps keep your surgery from being delayed.

## Abstract:

Worm infestation, is any macro parasitic disease of humans and other animals in which a part of the body is infected with parasitic worms. *Ascaris lumbricoides*, also known as the roundworm is the most common and largest nematode parasite. An editorial in Lancet in 1989 observed that if all the roundworms in all the people worldwide placed end-to-end they would encircle the world 50 times. In India *Ascaris lumbricoides* contributes 140 million cases. In India, the maximum prevalence is seen in Karnataka (47%) followed by Andhra Pradesh (40%). The prevalence rate in Tamil Nadu is 3.2% whereas in Pondicherry, it is 4.8%. In Gujarat it is about 20%. Allopathic medicines cannot be taken by everyone, on the contrary Homoeopathy has very good scope as it is the most reliable system without any side effects.

## Keywords:

Worm infestation, *Ascaris lumbricoides*, Individualization, Homoeopathy.

## A Case of 10 year old child:

HGP 10/M, came to my clinic with complain of abdominal pain since 5 days. He has chronic constipation since almost a year.

# A CASE OF ASCARIS LUMBRICOIDES WORM INFESTATION TREATED WITH INDIVIDUALISED HOMOEOPATHIC MEDICINE

**Chief Complain:**

Colicky pain in hypochondriac region since 5 days < on walking.  
Constipation – stool hard, difficult.

**History of Present illness:**

Patient is having colicky pain in hypochondriac region since 5 days. Pain starts gradually, initially very mild and then becomes severe and unbearable which is only relieved after taking medicine. Along with abdominal pain there is profuse perspiration on forehead which also subsides along with abdominal pain.

**Past History:**

Tonsillitis before 1 month, took homoeopathic treatment for that and relieved.

**Family History:**

Father – healthy (38 years old)

Mother – healthy (36 years old)

**Personal History:**

Appetite: decreased, eats only 1 chapati/meal.

Desire: Sweet, chalk, charcoal.

Aversion: nothing specific

Thirst: drinks frequently and little at a time.

Perspiration: profuse on forehead

Bowel: constipation. Irregular – once in 3-4 days.

Urination: 6-7/0, D/N.

Sleep: sound, dribbling of saliva during sleep.

Habbits/addiction: no any

Thermal: chilly.

**Mental generals**

Confused; very difficult for him to decide anything.

# A CASE OF ASCARIS LUMBRICOIDES WORM INFESTATION TREATED WITH INDIVIDUALISED HOMOEOPATHIC MEDICINE

**Life space:**

Patient comes from a middle class family. His father is a clerk in the bank. He is the elder child in the family. He is a very happy child but since 1 week he becomes quiet. He is average in his studies. His younger sister is very bright and clever. He likes to play in soil and dust.

Physical examination

General examination:

General appearance: fair complexion, looks very exhausted.

General built and nutrition: fatty person, well built.

Teeth: unhygienic, becomes black

**Vital signs:**

Pulse: 78/min

B.P.: 110/80 mm-hg

Temp: 97.80 F

RR: 19/min

Height: 131 cm

Weight: 50kg

BMI: 29.1kg/m<sup>2</sup>

**Systemic examination:**

GIT: Abdomen distended. Tenderness on abdomen. Rumbling is present.

**Provisional Diagnosis:**

Worm Infestation

Intestinal Obstruction

## Analysis of case:

### MENTAL GENERALS

- Confused; very difficult for him to decide anything.

### PHYSICAL GENERALS

- Appetite – decreased.
- Desire: Sweet, chalk, charcoal.
- Thirsty, drinks frequently and little at a time.
- Thermal: chilly.

### PHYSICAL PARTICULARS

- Colicky pain in hypochondriac region < on walking.
- Profuse perspiration on forehead along with abdominal pain.
- Constipation – stool hard, difficult.
- Teeth grinding during sleep.
- Dribbling of saliva.

# A CASE OF ASCARIS LUMBRICOIDES WORM INFESTATION TREATED WITH INDIVIDUALISED HOMOEOPATHIC MEDICINE

## Evaluation of case:

1. Colicky pain in hypochondriac region < on walking.
2. Profuse perspiration on forehead along with abdominal pain.
3. Constipation – stool hard, difficult.
4. Teeth grinding during sleep.
5. Dribbling of saliva.
6. Appetite – decreased.
7. Desire Sweet, chalk, charcoal.
8. Thirsty, drinks frequently and little at a time.
9. Chilly.
10. Confused; very difficult for him to decide anything.

## Totality of symptoms:

1. Colicky pain in hypochondriac region < on walking.
2. Profuse perspiration on forehead along with abdominal pain.
3. Constipation – stool hard, difficult.
4. Teeth grinding during sleep.
5. Dribbling of saliva.
6. Appetite – decreased.
7. Desire Sweet, chalk, charcoal.
8. Thirsty, drinks frequently and little at a time.
9. Chilly.
10. Confused; very difficult for him to decide anything.

## Repertorial totality:

1. Abdomen – pain – cramping, griping – hypochondria.
  2. Abdomen – pain – cramping, griping – hypochondria – walking while.
  3. Perspiration – profuse.
  4. Perspiration – pains – from.
  5. Rectum – constipation – difficult stool.
  6. Stool – hard.
  7. Teeth – grinding – sleep – during.
  8. Mouth – salivation – dribbling.
  9. Generals – food and drinks – charcoal – desire.
  10. Generals – food and drinks – charcoal – desire.
  11. Stomach – thirst – small quantities for, – often; and.
  12. Generals – cold – aggravation.
- Mind – confusion of mind.

# A CASE OF ASCARIS LUMBRICOIDES WORM INFESTATION TREATED WITH INDIVIDUALISED HOMOEOPATHIC MEDICINE

**Final diagnosis:**

Ascaris lumbricoides worm infestation

**Selection of Potency and Dose:**

200(medium).

**Prescription:**

Calcarea carbonica 200 single dose daily for 3 days.

S.L. 4 pills BD for 3 days.

## JUSTIFICATION FOR THE SELECTION OF THE PRESCRIBED REMEDY:

On repertorial analysis, Calcarea Carb came as the highest ranked remedy, covering maximum symptoms of patient. The constitution of the patient is also very similar to Calcarea carb. By referring different materia medica we can conclude that Calcarea carb is very good medicine for worm infestation. Considering Kent's materia medica, Calcarea carb so correct the indigestion, when the symptoms agree, that worms no longer hatch out.

## CONCLUSION

Well selected Individualized Homoeopathic medicine will not act as vermifuges but it makes the environment of intestine so unfit for the worms that they will not survive in such healthy environment. By giving Homoeopathic medicine the overall health of the patient will improve.

# A CASE OF ASCARIS LUMBRICOIDES WORM INFESTATION TREATED WITH INDIVIDUALISED HOMOEOPATHIC MEDICINE

## FOLLOW UP:

Sr. No.	Date	Complaints	prescription
1	5/1/2023	Abdominal pain relieved. Constipation still present – stool hard, dry, passed stool once in 3 days. Teeth grinding during sleep. Dribbling still present. Thirst – drinks little quantity. Appetite – decreased. Sleep – sound.	Calcarea carb 200 on every alternate day for 3 days. SL BD for 7 days.
2	12/1/2023	Abdominal pain relieved completely. Constipation still present – stool hard, passed stool twice in 7 days. Dribbling decreased. Teeth grinding relieved. Appetite – decreased. Sleep – sound.	Calcarea carb 200 single dose stat SL BD for 15 days.
3	26/1/2023	No abdominal pain. Constipation still present – stool somewhat soft, passed once in every 2 days. Dribbling relieved completely. Teeth grinding during sleep not relieved completely. Appetite – good. Sleep – sound.	Calcarea carb 200 single dose stat SL BD for 15 days.
4	9/2/2023	No abdominal pain. Constipation – stool soft passed once in every 2 days. Dribbling relieved completely. Teeth grinding relieved completely. Appetite – good Sleep – sound.	SL BD for 15 days. Calcarea carb 200 single dose (sos).
5	2/3/2023	No abdominal pain. Constipation – stool soft, passed once in every 2 days. Dribbling not present Teeth grinding not present Appetite- good Sleep – sound.	Calcarea carb single dose stat SL BD for 15 days.
6	16/3/2023	Constipation relieved. Passed stool daily. Stool soft. No straining. Appetite – good Sleep – sound. Advice stool examination before next follow up.	SL BD for 15 days.
7	30/3/2023	Constipation relieved. No any complains	SL BD for 15 days.
