HOMOEOPATHIC SPIRIT

QUARTARLY BULLETIN

VOL : 3 (SEP) YEAR **2023**

THE OBJECTIVE OF THIS INSTITUTIONAL BULLETIN IS :

1. To provide regular updates and propagate information about the accomplishments of all the faculty members and students.
2. To share significant information regarding the exceptional services rendered by the corresponding departments.
3. To keep everyone in this institution well informed and engaged with the objective to maintain motivation and raise morale.
4. This bulletin is for internal circulation and for educative purpose only.

EDITORIAL

We are delighted to present the Third volume of this year's Homoeo Spirit to all of you.

The year 2023 progresses with successful conduction of various curricular and co-curricular activities.

Jawaharlal Nehru Homeopathic Medical College has shown significant advancement in overall development of students. Various departments have actively encouraged and motivated students as well as faculty members to participate in workshops, promoting an environment that encourages continuous learning.

Many of our PG Scholars and undergraduate students demonstrated exceptional talent, with numerous articles published in esteemed journals. Our Hospital team remains committed, tirelessly organizing numerous health awareness programs and medical camps to benefit the community. We extend our heartfelt appreciation to the Management for providing a supportive and nurturing environment that enables our students to thrive and our staff to excel.

"Be Here, Be Vibrant"

Dr. Timirkanti Mahato
Professor & H O D,
Department of Pathology & Microbiology

INTRODUCTION:

1. Gout is disorder of purine metabolism characterised by increased serum uric acid level (hyperuricaemia) & deposition of urate crystals in the joints & soft tissue. These aggregated crystals of urate lead to tophi formation in joints & even soft tissues. Generally, incidences of gout are seen in 3rd decade of life, more commonly in men than women.
 2. The fundamental biochemical hallmark test for diagnosis of gout is serum level of uric acid; more than 7mg/dl of serum uric acid increases the risk of developing gout.
 3. Gout usually presents with acute gouty arthritis & if not taken care leads to chronic tophaceous arthritis. Acute gout is characterised by acute synovitis triggered by precipitation of needle shaped crystals of monosodium urate from serum or synovial fluid. There is joint effusion containing polymorphs (PMN) macrophages & microcrystals of urates.
 4. The mechanism of acute inflammation appears to be phagocytosis of crystals by leucocytes, activation of complement system leading to release of lysosomal products in the joint effusion.
 5. Initially, there is monoarticular involvement accompanied with intense pain in lower extremities & most commonly great toe, later on it becomes polyarticular along with constitutional symptoms like fever, malaise, etc.
 6. Recurrent attacks of acute arthritis led to progressive chronic arthritis. chronic tophaceous gout is characterised by synovial proliferation, pannus formation & progressive destruction of articular cartilage & subchondral bone. Tophi is mass of urate crystals located in joint spaces & even subcutaneous tissues.
 7. Tophi are surrounded by inflammatory reaction consisting of macrophages, lymphocytes, fibroblasts & giant cells.
- In advanced complicated cases, chronic gout involves kidney, leads to uric acid nephrolithiasis.

CLINICAL UTILITY OF HOMOEOPATHY IN CASE OF GOUT

ROLE OF DIET & REGIMEN:

1. As uric acid is main culprit here, we need to understand where does it come from? Uric acid is produced in body naturally as the end product of purine metabolism, & regularly it gets excreted through urine.
2. But when high quantity of purine (a chemical compound that helps in making DNA & RNA) rich diet is consumed, i.e. meat, alcohol, seafood, high sugary food & drinks raises the risk of developing hyperuricaemia & gouty arthritis.

WHAT HOMOEOPATHY HAS TO OFFER IN CASE OF GOUT?

According to research on gout, genetics or heredity plays important role. Such heredity or genetics is known as diathesis or predisposition to develop such disease due to certain genes.

In homoeopathy there are many medicines like lycopodium, lithium carbonicum, ledum palustre, colchicum & many others which presents uric acid diathesis.

On the basis of principle of individualization, one can choose following medicines on the basis of symptoms similarity.

1. Lycopodium Clavatum – uric acid diathesis, numbness, also drawing and tearing in limbs, especially while at rest or at night. Heaviness of arms. Tearing in shoulder and elbow joints. One foot hot, the other cold. Chronic gout, with chalky deposits in joints. Profuse sweat of the feet. Pain in heel on treading as from a pebble. Painful callosities on soles; toes and fingers contracted.
2. Colchicum Autumnale – Affects markedly the muscular tissues, periosteum, and synovial membranes of joints. Has specific power of relieving the gouty paroxysms. It seems to be more beneficial in chronic affections of these parts. The parts are red, hot, swollen. Tearing pains; worse, in the evening and at night and from touch; stubbing the toes hurts exceedingly. There is always great prostration, internal coldness, and tendency to collapse.
3. Ledum Palustre – Gouty pains shoot all through the foot and limb, and in joints, but especially small joints. Swollen, hot, pale. Throbbing in right shoulder. Pressure in shoulder, worse motion. Cracking in joints; worse, warmth of bed. Gouty nodosities. Ball of great toe swollen. Rheumatism begins in lower limbs and ascends (opposite). Ankles swollen. Soles painful, can hardly step on them.
4. Lithium Carbonicum – Uric acid diathesis. Whole body is sore. Gout and tophi. Pain in hollow of foot, extending to knee. Swelling and tenderness of finger and toe joints; better, hot water. Nodular swellings in joints. Ankles pain when walking.
5. Urtica Urens – Gout and uric acid diathesis. Favors elimination. Pain in acute gout deltoid; pain in ankles, wrists.

Thus, with the help of homoeopathic similimum along with diet & lifestyle modification, a homeopath can definitely do wonders in cases of gout.

Abstract:

1. Many major medications used today are derived from medicinal plants. Humans have traditionally employed bamboo in a variety of ecological and medical applications. Bamboo is one of the precious plant resources of the earth. A tall, thorny tree, *Bambusa arundinacea*, is a highly reputed medicinal tree commonly referred to as bamboo, a member of the Graminae family found throughout India, in moist parts of India. Various parts of the plant such as the leaves, root, shoot, and seeds possess anti-inflammatory, anti-diabetic, anthelmintic, anti-ulcer, antioxidant, anti-aging, anti-carcinogenic, anti-atherosclerotic, anti-apoptosis, cardiovascular properties, astringent activity, and activities that improve endothelial function, are well documented. It is also used in Homoeopathy for the management of symptoms related to rheumatic conditions like Ankylosing spondylitis, Cervical and Lumbar spondylosis, and female hormone complaints.

This study includes a review of different available homoeopathic literature for a better evaluation and understanding of the therapeutic values of the recently proven drug *Bambusa arundinacea*.

Keywords:

BAMBOO, BAMBUSA ARUNDINACEA, HOMOEOPATHY, ANKYLOSING SPONDYLITIS, CERVICAL SPONDYLOSIS, LUMBAR SPONDYLOSIS.

Introduction:

Bambusa arundinacea is a tall thorny tree widely distributed in South East Asia, mainly India, Japan, China, Thailand, Vietnam, Ethiopia, and the Philippines. A common bamboo found distributed throughout the moist parts of India, up to an altitude of 1250 m, particularly near riverbanks (Anonymous, 1988), in Central and South India ascending up to 1100 m on the Nilgiri (Nadkarni, 1976), also cultivated in many places in North-West India and Bengal. It is a member of the Grass family, commonly referred to as Bamboo, Mulmunkil, Bams, and Kantabams, etc., in regional languages. There are about 88 genera and 1400 recorded species of bamboo in the world. More than a billion people's quality of life and daily living have been impacted by utilizing various types of bamboo for a variety of purposes due to its characteristic flexible & highly tensile nature. Bamboo wood also contains a considerable amount of bio-energy.

In folk medicine, the leaves have been used to treat blood diseases & inflammation. The hardened material inside bamboo has been used for tuberculosis, asthma & leprosy. The shoots are said to be an appetite stimulant and digestion aid. The root has been used for ringworm. The juice from the flowers has been used for earache and deafness. Some modern studies confirm its anti-inflammatory and anti-tumor effects and its action on the uterus.

Classification:

Botanicalname: Bambusa arundinacea

N.O: Graminae

Family: Poaceae

Description of the plant:

Description of the plant: Bamboo is a tall thorny tree widely distributed in India. Tall, woody bamboo with many thorny stems that can grow up to 40 meters in length, tufted leaves, and internodes that are 30 to 45 cm long. It only blooms once in a lifetime, usually between the months of September and May, and its thin, linear leaves can grow up to 20 cm long [2, 3]. Bamboo requires humus soil that is well-aerated and permeable to water and grows rapidly [4]. The plant needs heat to survive or it will die if the temperature falls below 50°C. It lives many years and is commonly used as food, medicine, and even as a building material.

Parts used:

Roots, leaves, young shoots, seeds, and juice. The whole plant contains high levels of silica and is used in Ayurvedic medicine. Medicinal properties are also shown by various parts of plants as follows:

Young shoots:

young shoots against nausea, indigestion and wound infections.

Leaves:

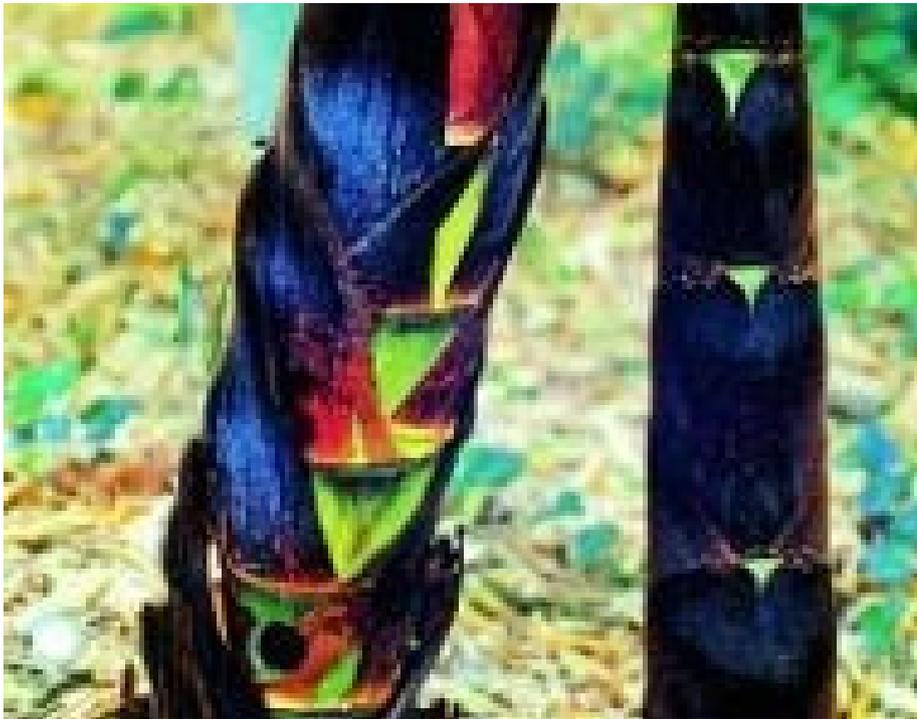

The leaves help against menstrual pains and worms and strengthen the function of the stomach.

ROOTS:

The roots are used for joint pain and general weakness, and the juice of the plant for osteoarthritis and osteoporosis.

Physicochemical action of Bamboo:

It has phytochemicals namely tannins that bind to proline rich protein and interfere with protein synthesis, phlobatannins used for its wound healing properties, these are anti-inflammatory and analgesic, flavonoids are hydroxylated phenolic substances known to be synthesized by plants in response to microbial infection, cardiac glycosides are used to treat ulcer and diabetic treatment, reducing sugar, phenols which are known to exhibit medicinals well as ayurvedic property.

Chemical category	<i>Bambusa arundinacea</i> (Retz.) Willd. seed variety
Tannins	+
Phlobatannins	+
Saponins	-
Flavonoids	-
Alkaloids	-
Terpenoids	-
Phenols	+
Cardiac glycosides	+
Anthraquinones	-

Bamboo and its proving in Homoeopathy:

Bambusa arundinacea is one of the homeopathic medicines recently discovered thanks to provings, since it was tested in 1996 by the German Bernd Schuster and entered the French pharmacopoeia in 2014. Proving was done on 20 subjects. All participants in the proving made comments about "tension and relaxation": 18 out of 19 refer to tension and 10 out of 19 refer to relaxation. The general theme of stiffness and relaxation was recorded during its proving [7]. Bamboo is characterised by elasticity, endurance, persistence, and powers of survival. One interpretation of bamboo is a lack of elasticity in terms of tension, tightness, or stiffness, but also at the other extreme excessive looseness in the form of laziness, day-dreaming, and hypermobility of the spine. This was seen in the study at all levels, from the psychological to the physical sphere by Schuster [7].

The bamboo stem is straight and cylindrical, having nodes between two internodes. It is strong, straight, and has the flexibility to bend all the sides likewise. The spine is made of 33 individual bones stacked one upon another. The vertebral column is the main support of the body and the theme of support, flexibility appears central to the bamboo remedy state. Similarly, the patient has a great desire for support from others. They feel responsible for everything and nobody helps them. They desire freedom and change but feel helpless and stuck in their situation and become irritable, jealous, restless, and sad.

Homoeopathic pathogenetic trial of *Bambusa arundinacea*:

In 1966, proving on a smaller group was done by Guillaume with 23 subjects where Guillaume saw good results with WALA Disci preparations and arrived at *Bambusa e nodo* (3x, 4x, 6x, 12x) by WALA. In 1996, German physician Bernd Schuster conducted proving on 20 healthy adult subjects and 12 single case records where he used a tincture of *Bambusa arundinacea* shoots in the 6x, 30c, and Q and documented definite symptomatic improvement in half of the patients. He used this to treat patients with herniated nucleus pulposus, Scheuermann's disease, ankylosing spondylitis, cervicodorsal malformation, and lichen myxedematosus.

Homoeopathy Literature:

The proving's and symptoms of the drug *Bambusa arundinacea* have been mentioned in our literature books like Dr. Robin Murphy's "Lotus Materia Medica-III" and in a few homeopathic software such as RadarOpus under the Synthesis & Murphy's Repertory and in Synergy Homeopathic Software under the "Reliable Reverse Repertory" and "SherrQ Reverse Repertory" in rubrics for the better understanding and application of *Bambusa* into practice.

Lotus Materia Medica-III

Bambusa arundinacea

Clinical indications: Acne, Ankylosing spondylitis, Arthritis, Backache, Belching, Colds, Constipation, Cystitis, Depression, Diarrhoea, Dyspepsia, Gingivitis, Headaches, Heartburn, Indigestion, Influenza, Insomnia, Joint pains, Leucorrhoea, Motion sickness, Nausea, Neck pain, Neuralgic pains, Nightmares, Post-partum depression, Rheumatism, Ringworm, Sciatica, Spinal injuries, Stiffness, Tendonitis, Torticollis, Tuberculosis, Vertigo, Vomiting.

Mind: Dullness, sluggishness, difficulty thinking and comprehending. Concentration difficult while driving, studying, makes mistakes in writing, omitting letters. Absent-mindedness. Memory weakness, from mental exertion. Forgetful. Imagines he/she is deceived, deserted, forsaken. Delusions everything will fail. Imagines he has ruined his health.

Abdomen: Gas and bloating. Obstructed flatulence. Rumbling noises. Biliary complaints with tenderness in the gallbladder region.

Back: Backaches. Spinal injuries. Ankylosing spondylitis. Burning along the spine. Stiffness and tension. Cramping, aching and dragging pains. A knotted feeling in the back. Heat waves, flushes. Numbness and tingling. Sacroiliac pains. Coccyx pain, after injuries. Stiffness. Stiffness, shoulders. Neuralgic and rheumatic pains, shoulders.

Female: Dysmenorrhea. Profuse menses. Suppressed menses. Offensive leucorrhoea. Post-partum depression, accompanied by a stiff neck, back pain or sciatica (Cimic.). Prolonged lochia. Menstrual problems after childbirth. Excoriation of cervix. Tearing pain in ovaries

Fever: Influenza (Rhus-t.).

Limbs - Rheumatic pains. Stiffness, worse from damp, cold weather. Sciatica, as if painful electric currents running down the sciatic nerve to the hollow of the knee. Sharp, stitching pains. Numbness and tingling. Twitching of limbs. Radiating pains. Wandering and wave-like pains. Icy cold hands and feet. Weakness and heaviness. Swelling of the ankles. Weak ankles. Burning in the soles of the feet and icy cold feet. Weakness of the hand, difficulty in writing with contractions and spasms.

Modalities - Pains are better from rest, heat, hot drinks. Worse in the morning on waking, from cold and damp.

Neck - Stiffness, worse from damp, cold weather. Tension in neck. Very difficult to turn the neck. Torticollis.

Sleep: Insomnia. Sleeplessness, from an overactive mind. Constantly turning ideas over in the mind. Wakes 3:30 a.m. to 4:30 a.m. Confused dreams. Nightmares. Dreams of accidents, misfortune, disease, deaths. Dreams of animals, water. Dreams children, old friends. Dreams of teeth falling out. Amorous dreams.

Stomach: Belching. Heartburn, worse from excitement, beer. Indigestion. Dyspepsia. Empty, weak, hungry feeling. Nausea from odors. Nausea with headaches. Motion sickness. Lump sensation. Vomiting after nuts and in the evening.

Temperature: Alternating fever and chills. Chilliness, worse at night. Shaking, shivering with chills.

Reliable Reverse Repertory [10].

Bambusa arundinacea [BAMB-A] – Mind Rubrics

§ Ailments from; anger, vexation; suppression, of

§ Bed; desires to remain in

§ Brooding

§ Delusions, imaginations, hallucinations, illusions; deserted, forsaken

§ Emotions; suppressed; ailments from

§ Forsaken feeling

§ Indifference, apathy; everything, to

§ Responsibility; ailments, from

Repertory of Mental Qualities [Q-Rep], 3rd edition compiled by Jeremy Sherr and Raphael Neu and updated in July 2018 into Materia medica format [10].

Bambusa arundinacea [BAMB-A] – General Rubrics

§ Judgmental: judgmental quality. (332)

§ Knives and points: knives and points quality. (163)

§ Light: Light Quality. (429)

§ Light and Dark: Light and Dark Quality. (188)

§ Low self-esteem: low self-esteem quality. (281)

§ Low self-esteem: low self-esteem primary remedies. (40)

§ Money: money quality. (241)

§ Money: money primary remedies. (37)

§ Music: Music Quality. (285)

§ Opinion of Others: Opinion Of Others Quality. (271)

§ Perfectionist: perfectionist quality. (242)

§ Perfectionist: perfectionist primary remedies. (46)

§ Trapped: Trapped Quality. (256)

§ Victim: victim quality. (377)

§ Victim: victim primary remedies. (72)

§ Water: Water Quality. (393)

Discussion:

Nowadays, due to sedentary lifestyle habits, 80–90% of the population are seeking medical advice for common problems like low back pain and neck pain at some point during their lives. Such common problems majorly affect the quality of life of a person. In conventional treatment, NSAIDs or surgery is the only available option. Hence there is a necessity to explore the possibility of using Homoeopathic intervention in such cases. It is found in our literature that in Homoeopathy, *Bambusa arundinacea* has great action on the musculoskeletal system. The proving with this remedy was done in 1994 by Schuster on 20 subjects and 12 case studies only. Further re-proving of this drug with a larger sample size is needed to include this medicine in our routine practices.

Conclusion:

Bambusa arundinacea has a wide therapeutic value in homoeopathy as well as other systems of medicine. This medicine can be extensively used in managing rheumatic and feminine complaints if proven properly. During the literature review, it was found that only a few books like *Lotus Materia Medica-III* and a few latest repertories like *Synthesis* and *Reverse* reliable repertories mentioned *Bambusa arundinacea* medicinal indications. More proving and re-proving on animal models and preclinical and clinical trials are needed to enhance our practice with this drug. In the future, prospective and experimental studies using a larger sample size are recommended to assess the potentiality of this drug even better.

Conclusion:

Bambusa arundinacea has a wide therapeutic value in homoeopathy as well as other systems of medicine. This medicine can be extensively used in managing rheumatic and feminine complaints if proven properly. During the literature review, it was found that only a few books like Lotus Materia Medica-III and a few latest repertories like Synthesis and Reverse reliable repertories mentioned Bambusa arundinacea medicinal indications. More proving and reproving on animal models and preclinical and clinical trials are needed to enhance our practice with this drug. In the future, prospective and experimental studies using a larger sample size are recommended to assess the potentiality of this drug even better.
