**Objective:**

- To understand the structural components and operational processes of a **3.5 MLD Sewage Treatment Plant (STP)** at Parul University.
- To observe the practical application of wastewater treatment principles and their role in **environmental sanitation and public health protection**.
- To correlate theoretical knowledge of sewage disposal with **real-life institutional wastewater management practices**.

**Activity Details:**

- Dept. of Community Medicine had conducted educational field visit for the students of 3<sup>rd</sup> BHMS to Sewage Treatment Plant of Parul University under the guidance of HOD Dept. of Community Medicine Dr. Pranali Mistry.
- During the visit to the **3.5 MLD Sewage Treatment Plant at Parul University**, students were taken on a guided tour of the facility by plant personnel.
- The sequence of sewage treatment was explained in detail, starting from the inlet chamber and screening units to remove large solids, followed by grit removal, primary settling, biological treatment through aeration tanks, and secondary clarification. The process of sludge collection and disposal was also demonstrated. Students observed the functioning of mechanical and biological units, flow regulation, and safety measures adopted within the plant.
- Interaction with technical staff helped students understand operational challenges, monitoring parameters, and the importance of proper maintenance. Emphasis was laid on the role of sewage treatment in preventing environmental pollution and safeguarding community health.

Glimpses of activity:

Outcome:

- Students gained practical knowledge of sewage treatment processes and the functioning of an STP.
- Students developed an understanding of the public health and environmental significance of effective wastewater treatment.
